

Melissa I won't want to write to these people but if you want any thing or info I am at your service, even my work tools have been piffered, as well as a lot of rare masonic items. But let me know or if urgent I will come down if you can put me up overnight at your or your Partner Place. Blessed Be. J.

Scott's.

My Dear Melissa,

The late G.B.G always started his letters to those he chose to be close to him thus so, you will appreciate I have rubbed out the sticky "SCOTT" label and apologies for my underestimating you.

If you recall, I did mention once you got started you would be surprised to find out those that know Charles Clark, Selbach, and just plain Charlie.

Melissa there is only one person can help you in your quest for truth (WICAC) and I do keep my promises.

This info is around 30 years tho. Mathieson went likely been born then. There are not many items of note left unsaid, but, if you will make arrangements any time you are up this way, make out a list of questions and explain Mathieson or what source, and I will put you completely in the picture, since Doreen, Lois, Pat Crowther, and the other I brought in were the original 'Founder members' as gardenians were and I hope you

will bring that Situation back to what it should be.

as for my thoughts on this letter, these chaps work on supposition and put their own interpretation on what they pick up, but G.B and others were masters at misleading unwelcome intrusion. We were all breaking new ground in a very moral field of thought and drastically miss understood way of life. Did I ever mention supporting Jean Straker Photographs and others on anti censorship in visual and printed works etc. you would need to understand how the moral way of life was. Since I came back to the fold its simply amazing the breakdown of Barriers. Like the Berlin wall, the moral Barriers are amazing.

So much has gone astray that I had, and I would count it a privilege to work with you on your project and Thank you for being you and its as little as I can do to help, of course this means John and Dona too. But I feel your "vocation" will not be fully appreciated or developed while I am here but please feel free to send and ask specific questions

So much of my mind is blank and cannot be brought back But your wish is my command. Yours in the G.S. ☆ (111111)
Sebach. Charlie.
